endosome organization
basement membrane
cardiac conduction
Z disc
regulation of heart rate
I band
myofibril assembly
regulation of striated muscle contraction
cardiac muscle contraction
regulation of cardiac muscle contraction
sarcomere
regulation of heart contraction
myofibril
striated muscle contraction
contractile muscle fiber
cornified envelope
heart contraction
actin filament−based movement
keratinization
neuron fate commitment
heart process
regulation of blood circulation
muscle contraction
cardiac muscle cell development
keratinocyte differentiation
skin development
negative regulation of neuron differentiation
dorsal/ventral pattern formation
spinal cord development
central nervous system
neuron differentiation
